

GNU Radio Documentation Wiki

Wiki Draft

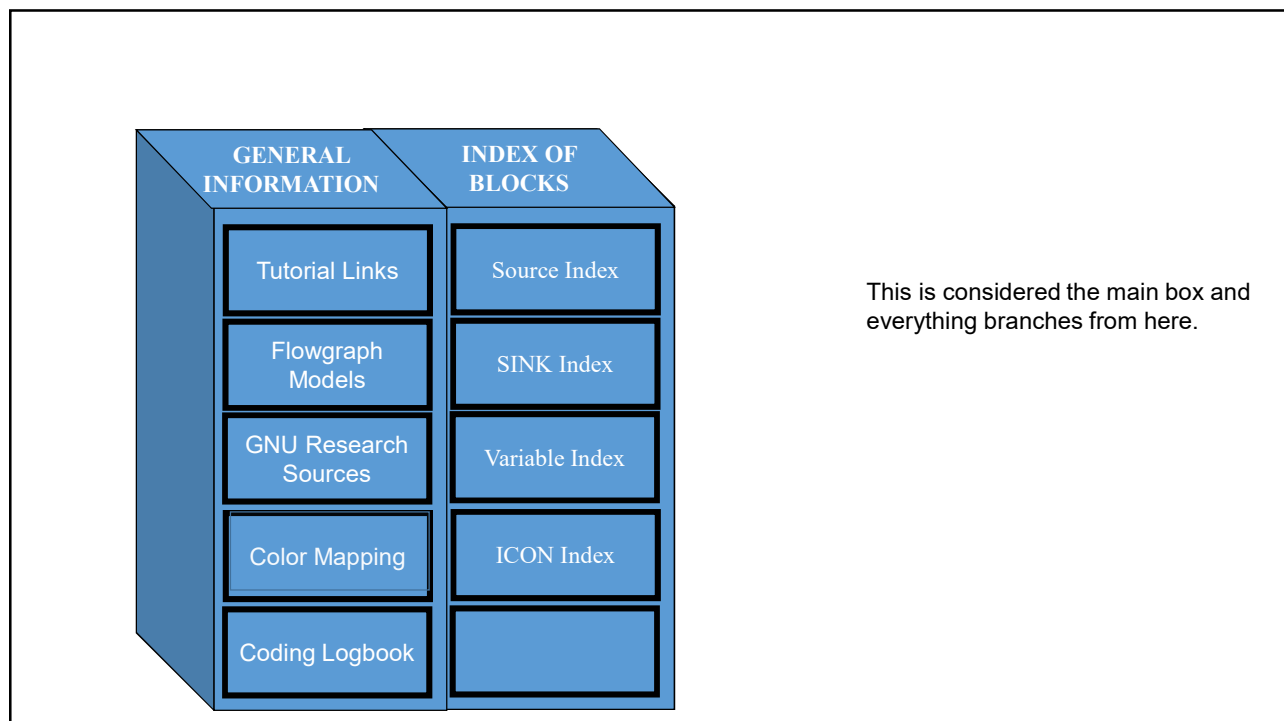

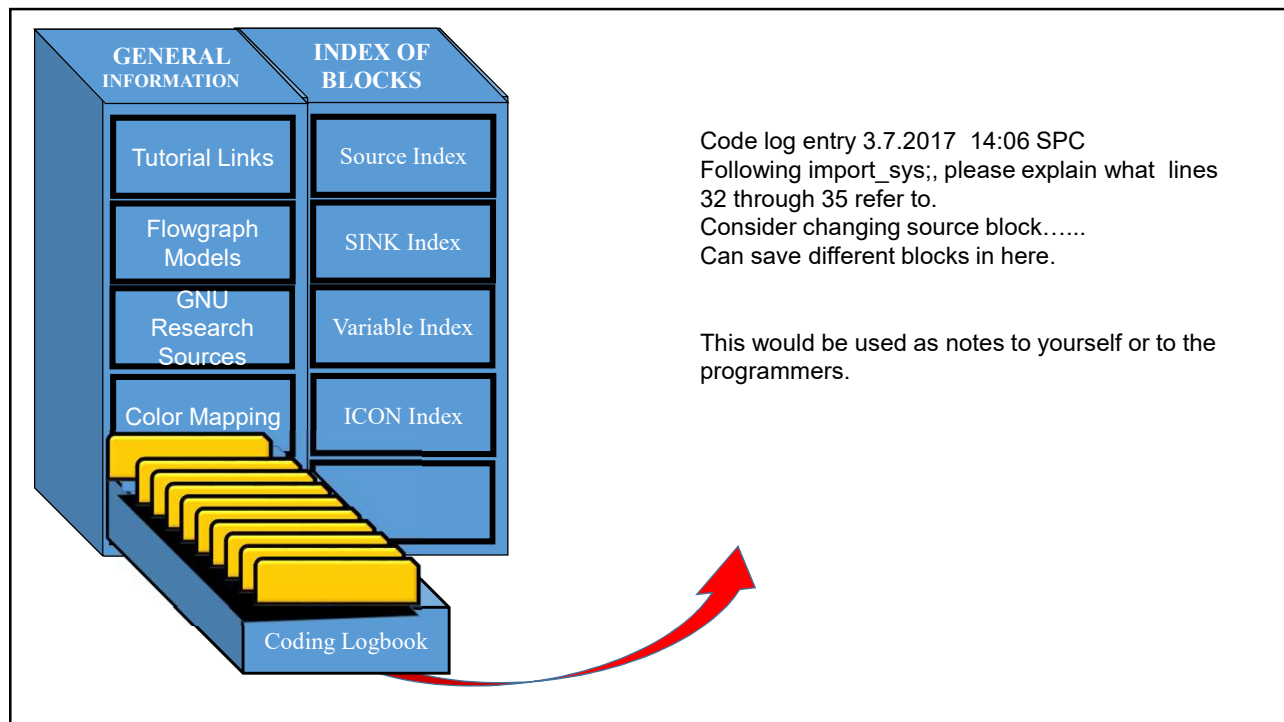

I created this and thought I would post. Feel free to use if like.

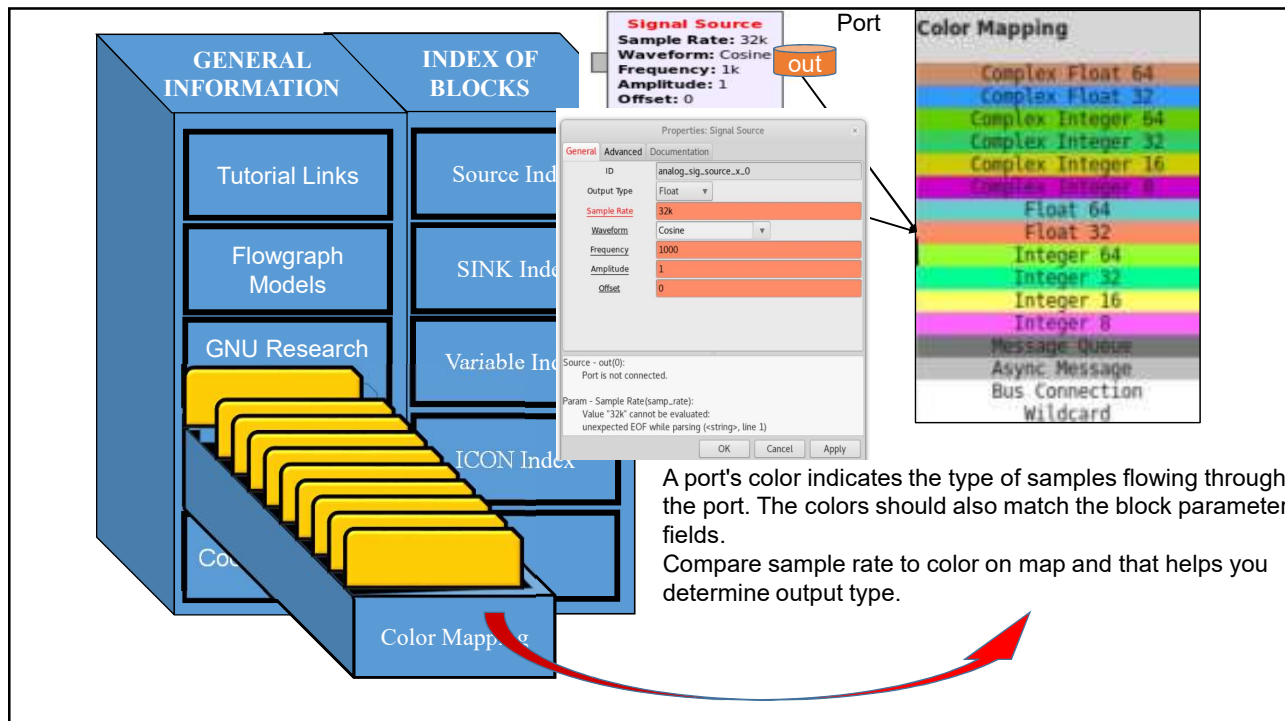

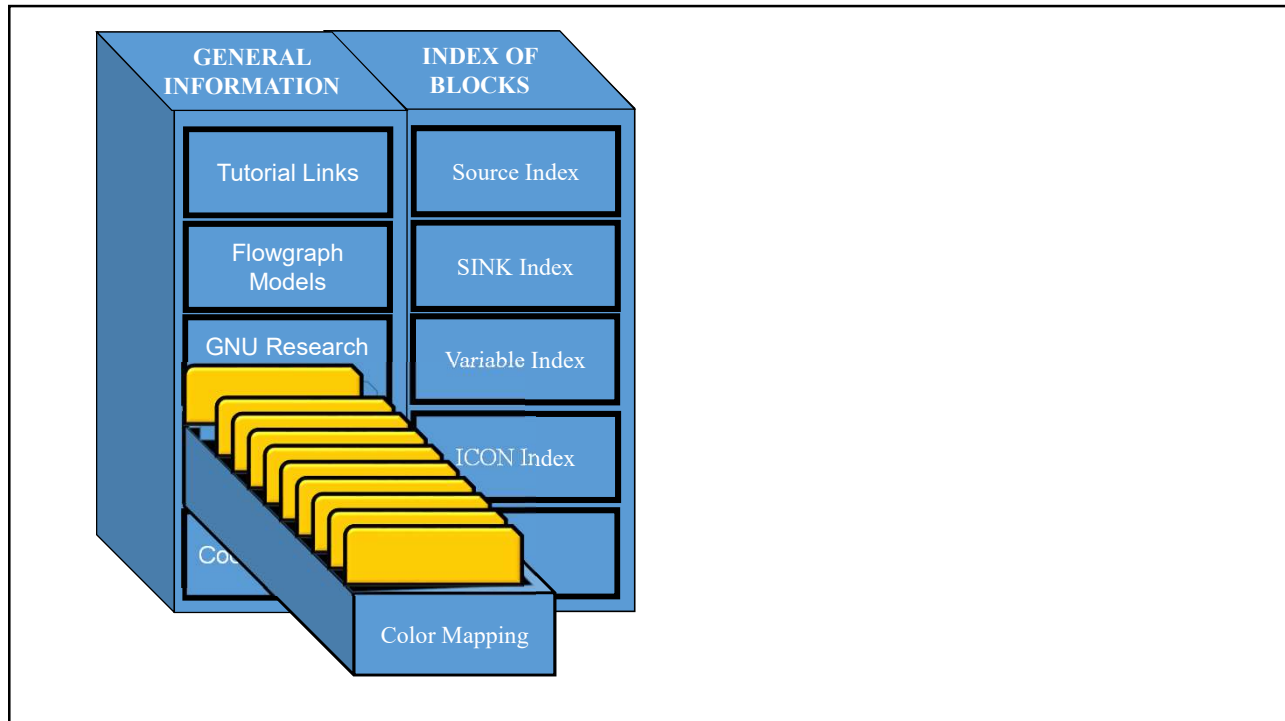

GNU Radio Documentation Wiki

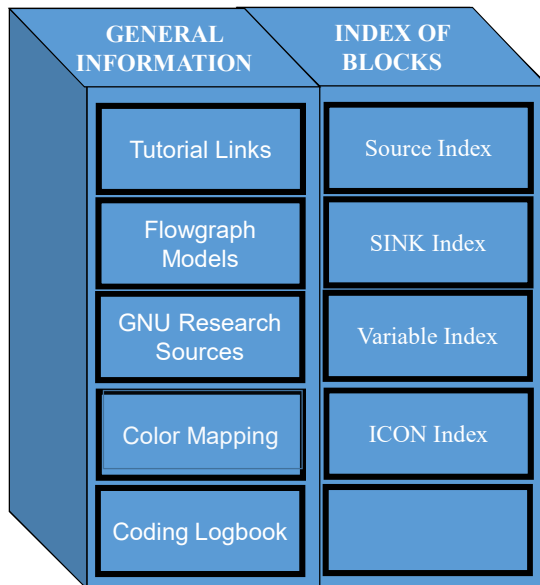

LOGO

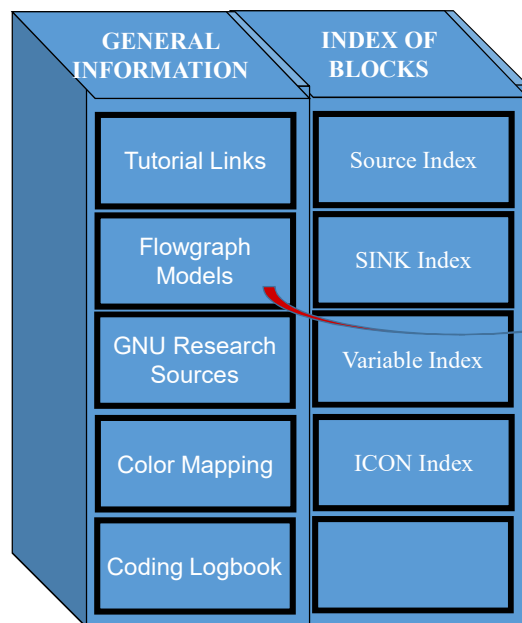

This is how I began to organize all the different sections of this project.

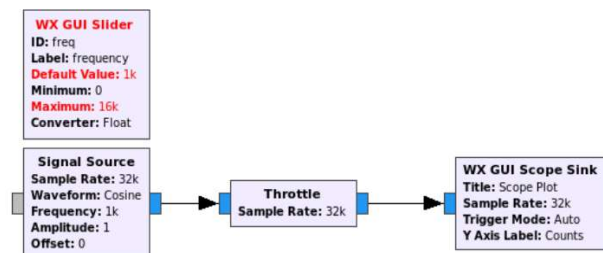

Now we look at Flowgraph models.

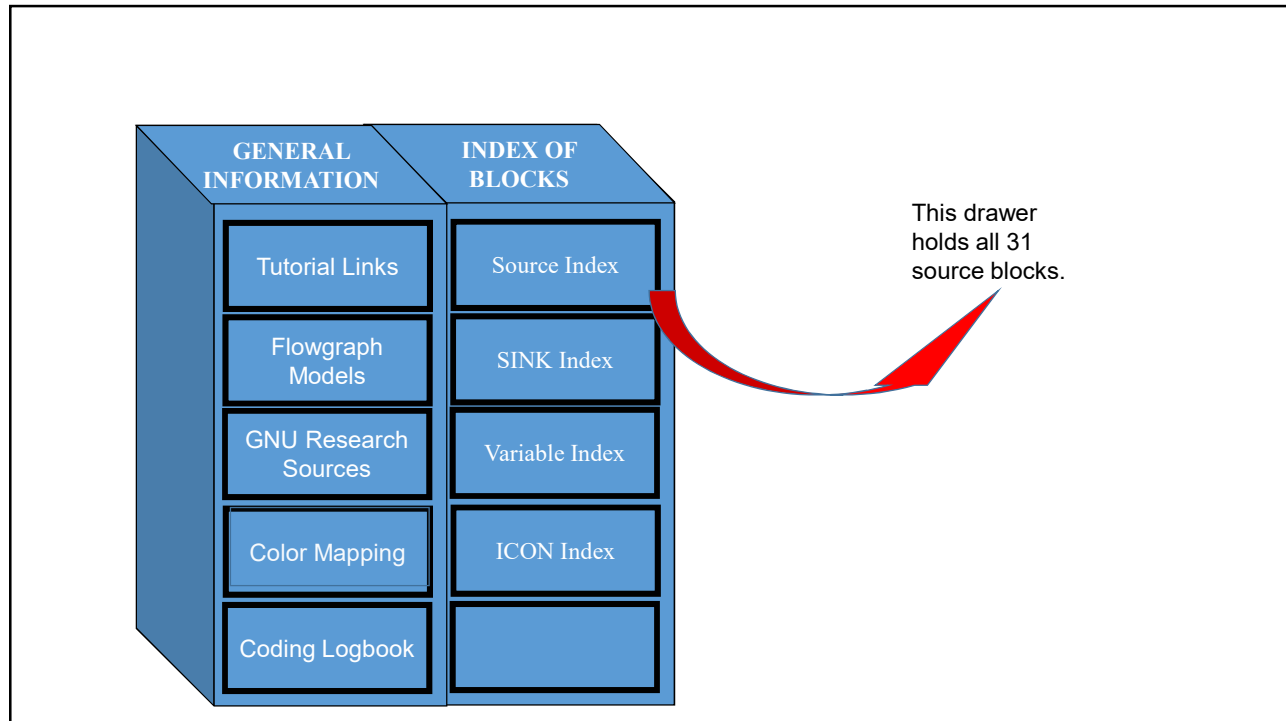

Two examples of flowgraphs

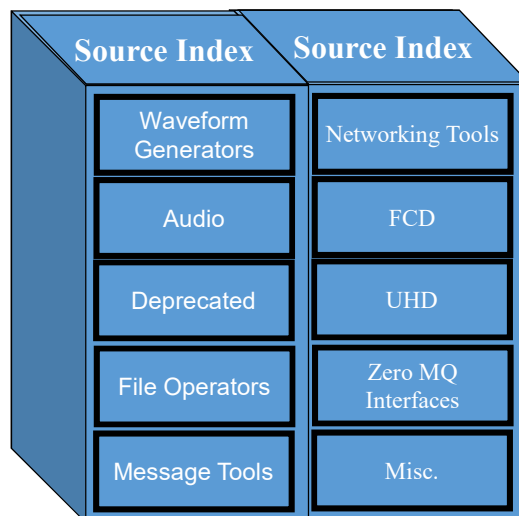

Connect the ports by clicking on the port of one block, and then clicking on the port of the other block. If you click on the connection line and then hit the Delete key, the connection line will disappear.

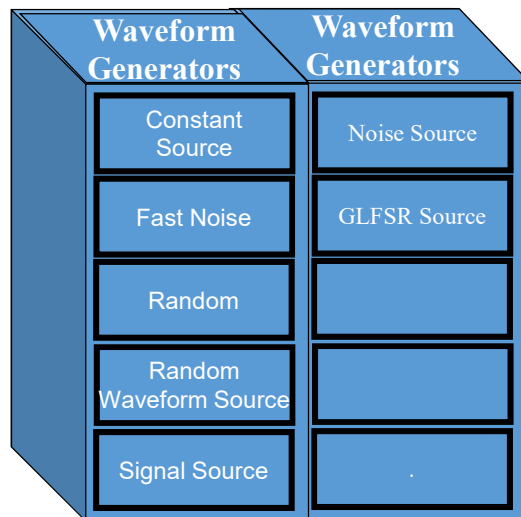

Source Index

This shows the different categories of the source blocks.

Now let's open up the Waveform Generator drawer.

These are all the different source blocks found under Waveform Generators.

Each of these drawers could hold the code and properties of each source block and anything else related to that block.
